Option Two: the team thinks contribution between members was unequal

active member:

- Zijun Li

- Gilead Bempah

- Samuel Okasia

Member Name	Justifications of work done	Score
Zijun Li	Initilize the VM, setup the CI/CD pipeline. Done whole todo list feature and GDPR policy. Created the vertical navbar and fixed some bugs of it. Add switching the theme function. Writen Latex file for every Milestone submission. Organized part of the meetings and content integration for everyone.Assist other team members to complete the feature	22
Gilead Bempah	Developed the Anti-Procrastination feature, created the blocking Chrome Extension, assisted in the creation of the Diary, History, and Scheduler features, and helped setting up communication with the database for most features. Assisted in the development of Navbar, email and making data user-specific.	18
Samuel Okasia	Designed and implemented login page, Designed and implemented home page, Designed and implemented History page, Tweaked Design for Anti-procrastination page, Created Logo	16
Bogdan-Marian Gheorghe	Designed and implemented Inbox feature, Modified To-Do list Feature and Anti-procrastination feature to send emails when something specific happens like a to-do item is marked as done or when a new URL is blocked, created Gmail account and SMPT credentials for the project, linked credentials and set-up email Service along with Endpoint API.	13
Matthew Goulding	Designed and implemented Alarm feature, Designed html for Alarm chrome extension	11
Chance Egbon	Design and fully implemented the task I was assigned to develop, the diary feature. This include the html, CSS and typescript of the diary feature.	10
Smit Navinkumar	Did all the things relating to the scheduler feature, so designed and implemented the scheduler feature with a live schedule feature, along with some accessibility requirements in the feature as well.	10

## The Outcome of the Intervention Meeting

During the intervention meeting, our team discussed the importance of effective communication, collaboration, and active participation in the project. We acknowledged that frequent meetings and open dialogue were crucial for fostering a positive team dynamic and ensuring that every member's voice was heard.

As a result of the intervention meeting, the team members became more aware of the need for open communication and collaboration. By implementing regular meetings, we were able to allocate tasks more evenly and monitor the progress of each team member, leading to a more balanced distribution of responsibilities.

Moreover, the intervention meeting led to an increase in participation among team members. As we emphasized the value of each member's contributions, team members became more engaged and took a proactive approach to their tasks. This improved collaboration and encouraged team members to offer support and assistance when needed, resulting in a more cohesive and efficient working environment.

Justifications for unequal contributions

Despite the intervention meeting's positive impact, some team members' engagement levels remained relatively low, particularly in terms of code updates (git commits) and task completion enthusiasm. These members did not actively participate in discussions or volunteer for tasks, leading to an imbalance in contributions. More details could check in Contributor statistics and Graph(Click for following the link)
