Marking prompts for final year undergraduate projects

Quality of the report

Is the problem clearly formulated?

Is the topic covered accurately and in sufficient depth?

Are the key design and implementation decisions clearly described and justified?

Has all work undertaken been carefully and critically evaluated?

Is it fluently written?

Well organised with appropriate sections, figures, tables etc?

Are references correctly used?

Are there appendices or other evidence of technical achievement?

Technical contribution

Is the contribution of the required depth?

Are the methods used fit for purpose and have they been implemented rigorously?

Is what has been produced stable and robust?

Quality of Process

Was the problem well-researched and has existing work been carefully analysed?

Is there clear evidence of systematic specification and design?

Evidence of systematic implementation and testing?

Substantialness of Achievement

Has sufficient work been conducted for the level/credit value of the project?

Is that work of sufficient complexity?

Does the project demonstrate thoroughness and attention to detail?

Does this project demonstrate flair, imagination or original thinking?
