Project Proposal

for

Mirror News Summarizer

Student Name: Zijun Li

Student ID: 2272583

Supervisor Name: Jizheng Wan

Project Category/Topic: AI

1 Project Aim:

- To develop a web-based platform that delivers summarized content of articles from renowned news websites, ensuring that userss ca swiftly grasp the core message without having to dive into the full article.

- **Significance**: As the digital world continues to burgeon, the influx of information has become overwhelming. With countless articles and news pieces flooding the internet daily, it is a challenge for individuals to stay updated without investing a significant amount of time. This platform aims to make new consumption more efficient, saving time while ensuring that users are not missing out on crucial details. The system would also deter misinformation by directing users to legitimate sources and providing concisse, yet comprehensive summaries.

- **Relevance to AI**: The core of this project hinges on Natural Language Processing(NLP) technologies to automatically generate summaries.
